SUMMARY

Fresh Graduate Bachelor's Degree in Informatics Engineering from Universitas Komputer Indonesia specializing in Web Development. Hands-on experience in building scalable and responsive web applications using Laravel, Vue.js, and Tailwind CSS. Proven track record in managing end-to-end technical projects, including an automated hospital registration system and collaborative warehouse dashboard. Seeking a Web Developer role to leverage strong problem-solving skills and deliver efficient digital solutions.

WORK EXPERIENCE

PT. Pindad (Persero) Bandung **Sep 2025 – Oct 2025**
Fullstack Developer | Internship

- Designed and developed a full-stack IT warehouse management dashboard to monitor hardware inventory and department operations.
- Built responsive front-end interfaces and managed back-end server logic with database systems to streamline item tracking and log updates.
- Collaborated in the software development lifecycle to ensure accurate data integration and system stability for warehouse workflows.

PT. Teknologi Inti Makmur **Jan 2019 – Jun 2019**
IT Support & Hardware | Intern

- Designed, assembled, and programmed custom hardware monitoring devices to track company operational infrastructure in real-time.
- Conducted regular system monitoring, hardware maintenance, and troubleshooting to minimize technical downtime and ensure device reliability.
- Provided daily IT support, handling hardware, software, and network issues to maintain smooth internal operations.

RSU Pindad Bandung **Jan 2026 – Jun 2026**
AI & Fullstack Developer | Project

- Designed and deployed a real-time biometric Face Recognition Kiosk system for JPPK patient verification using YOLOv8 and DeepFace (FaceNet).
- Built a high-performance microservices architecture integrating a FastAPI Python AI backend, Laravel REST API, and Vue.js front-end interface.
- Optimized biometrics scanning with a custom MySQL-to-RAM database sync mechanism and Cosine Similarity algorithm for instant, low-latency identity matching.
- Engineered a hybrid biometrics extraction feature processing 200-frame video streams to generate high-accuracy face embeddings ("Super DNA").

EDUCATION

Universitas Komputer Indonesia Bandung **Sep 2022 – Nov 2026**
Bachelor of Informatics Engineering - GPA 3.36/4.00

- Relevant Coursework includes Web Development, Software Engineering, Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence, and Computer Networks.
- Author of the scientific paper "PEMBANGUNAN APLIKASI PESERTA JPPK BERBASIS FACE RECOGNITION TERINTEGRASI WHATSAPP API SEBAGAI SOLUSI LAYANAN TANPA KARTU".

SMKN 4 Bandung **Jul 2019 – Jul 2022**

Computer and Network Engineering

- Studied network infrastructure, routing, switching, and MikroTik/Cisco device configurations.
- Gained hands-on experience in Linux/Windows server administration and network services (DNS, DHCP, Web Server).
- Mastered computer hardware assembly, OS installation, network security, and systematic troubleshooting.

CERTIFICATIONS & TRAINING

National Agency for Professional Certification (BNSP) **Aug 2026 – Aug 2028**

Data Analyst Competency Certification - KOMPETEN

- Performed data cleaning, data processing, and analytical workflows using Microsoft Excel.
- Processed and analyzed complex datasets to generate actionable business insights.
- Built interactive data visualizations and business dashboards using Power BI.
- Presented data-driven findings via structured reports and visual analytics to support strategic decision-making.

Google for Education **Aug 2026 – Aug 2029**

Gemini Certified Student

- Mastered practical applications and workflows using Google Gemini.
- Demonstrated core foundational knowledge and competencies in artificial intelligence technologies.

Direktorat AP2SC UNIKOM **Sep 2025 – Feb 2026**

Computer Hardware Certification – Excellent 90,62/100

- Demonstrated core competency in Computer Hardware Assembly.
- Certified proficiency in Operating System & Software Installation.
- Certified proficiency in Computer Networking Fundamentals.
- Proven skill in Computer Hardware & System Troubleshooting.

TECHNICAL SKILLS

- Programming Languages: PHP, Python, JavaScript, SQL
- Web Development: Laravel, Vue.js, Tailwind CSS, HTML5, CSS
- Database Management: MySQL, Relational Database (SQL)
- Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Data Analysis, Microsoft Excel
- Data Visualization: Power BI, Tableau, Dashboard Design & Reporting

SOFT SKILLS & TOOLS

- Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability, Time Management, Attention to Detail, Fast Learner
- Software & Tools: Visual Studio Code, Git & GitHub, Postman, Jupyter Notebook, Laragon, MySQL / phpMyAdmin, Microsoft Power BI, Tableau, Figma, Microsoft Office
- Languages: Indonesian (Native), English (Fair) Certification TOEFL 437.
